

# Up to 14% more in the clamp.

## SU Hybrid Ryes far outweigh the competition.

Elsoms and Saaten Union's hybrid rye portfolio deliver better value than you might expect, with reliable yields that consistently outperform the competition.

### 2025 Saaten Union Trial

| Trial harvested (19.06.25) | Notes | Plot fresh weight kg (1.0m x 1.2m) | Plot fresh weight t/ha | % DM | DM yield t/ha | DM yield as % of control |
|----------------------------|-------|------------------------------------|------------------------|------|---------------|--------------------------|
| SU Baresi                  |       | 4.69                               | 39.06                  | 47.5 | 18.53         | 113.49                   |
| SU Erling                  |       | 4.61                               | 38.39                  | 46.0 | 17.66         | 108.15                   |
| Competitor 2               |       | 4.23                               | 35.22                  | 46.4 | 16.33         | 100.02                   |
| SU Performer               |       | 4.18                               | 34.83                  | 46.9 | 16.33         | 99.97                    |
| SU Thor                    |       | 4.14                               | 34.47                  | 47.1 | 16.22         | 99.32                    |
| SU Perspectiv              |       | 4.09                               | 34.08                  | 47.5 | 16.20         | 99.20                    |
| Competitor 1               |       | 3.91                               | 32.56                  | 47.0 | 15.30         | 93.70                    |
| Triticale (winter)         |       | 3.65                               | 30.39                  | 49.1 | 14.93         | 91.45                    |
| Competitor 3               |       | 3.77                               | 31.44                  | 46.9 | 14.76         | 90.39                    |

Note: 2025 was a difficult year, with lower yields due to extreme drought and field conditions.
