Pumpkin Squash Gourd

VARIETY PORTFOLIO

Pumpkins are a fast-growing opportunity for both large-scale producers and pick-your-own farms. At Elsoms, we're building a competitive portfolio of high-performing varieties backed by dependable service and specialist support.

Unlocking the
power of plants

Reliable seed for real results.

At Elsoms, our role goes beyond supplying seed. We offer reliable logistics, consistently high seed quality, and dependable germination rates, so you can plan with confidence. With demo plots and trials available, you can see performance first-hand before you commit. And our expert team is here to support you through every stage of the season.

Choice that works for you

Whether you're growing cucurbits for carving,

colour or curiosity, our expanding range includes options to suit different markets, growing systems, and farm sizes. From commercial scale to diversification projects, we help you match the right variety to your goals.

A growing portfolio

What you see in this supplement is just the start. To explore the full range and discover how Elsoms can support your crop long-term, visit our website or get in touch today on 01775 715000.

Pumpkin

Early Abundance

Compact full vine plant with strong production. Shallow ribbing and well-proportioned handles. Intermediate resistance to powdery mildew ensuring reliable crops.

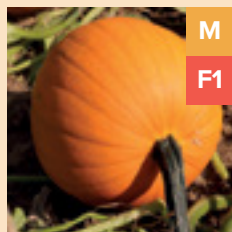

S

F1

Neon

Lightning-fast maturity for quick crop turnover. Compact semi-bush habit allowing increased plant populations. Uniform, solid orange fruits with attractive dark handles featuring high pack-out yields.

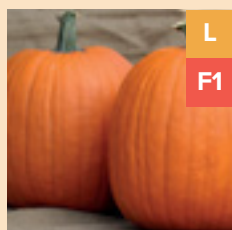

M

F1

Early Prince

Full vine habit providing vigorous growth. Dark, well-attached handle for easier harvest and transport. Intermediate resistance to powdery mildew ensuring crop reliability.

L

F1

Camaro

Premium hybrid with strong powdery mildew resistance. Reduced vine habit, high yields. Uniform, nearly spherical fruits, weighing 9-10.5kg/20-23lbs. Top choice for growers prioritising disease resistance and yield.

XL

F1

Aspen

Semi-bush plant habit gives controlled vine growth. Dense flesh improves shelf life and reduces chances of rots and decay. Durable dark green stem enhances harvest and storage quality.

XL

F1

Jill-Be-Little

Rich dark skin with deep sutures enhances visual appeal. Produces up to six fruits per plant, increasing overall yield. Uniform fruit size and shape for consistent harvest quality.

XS

Flame

Dual-purpose use as an ornamental pumpkin and winter squash. Reduced vine habit improves yield and disease management. Intermediate powdery mildew tolerance for crop security.

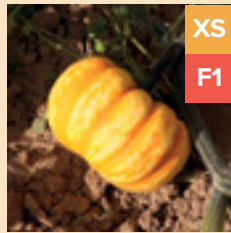

S

F1

Spark

Distinctive, contrasting yellow and deep orange striped fruits. Vigorous habit with excellent powdery mildew resistance. Exceptionally uniform fruit for consistent harvest and market quality.

XS
F1

Lemon Sun

Unique lemon-yellow colour for stand out displays. Powdery mildew tolerance for dependable field performance. Semi-bush vine habit supports easier crop management.

M
F1

Blaze

Distinctive yellow and deep orange striped ornamental fruit. Strong, firmly attached dark green handles for easy harvest. Vigorous plants with excellent powdery mildew resistance.

M
F1

Snowdrop

Prolific yields, with plants often setting 8-20 fruits. Striking bright white colour that holds well in the field. Compact true pumpkin shape with strong, well-attached handles.

XS
F1

Choose from over 30 varieties to suit your growing system and end market

Baby Bumps

Firm, hard warts that withstand handling and field conditions. Small, uniform fruit ideal for mixed displays. Cute round shape with strong novelty appeal.

S
F1

Baby Moon

Compact, reduced vine habit optimising space utilisation. Uniform, shiny white pumpkins with strong green handles. Balanced mid-season maturity delivering consistent yields.

S
F1

Eros

Very dark burnt orange colour, highly attractive in the field and on display. Thick, dark green handles that are reliable, sturdy, and can withstand transport.

XL
F1

White Lightning

Market-leading white pumpkin with strong retail appeal. Classic round Halloween shape with slight ribbing. Sturdy, heavy handle for durability and ease of handling.

L
F1

Challenger

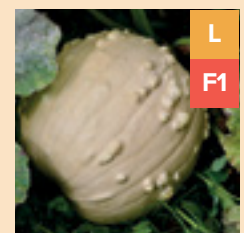

Deep ribbing and sturdy green handle enhance visual appeal. Reduced vine habit gives efficient field management. Consistent yields of 2 marketable pumpkins per plant.

XL

Homestyle

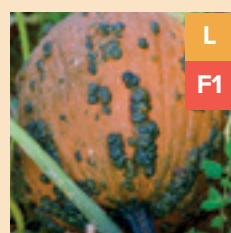

Butter-coloured pumpkin with novel texture. Unique, visually appealing novelty fruit for autumn displays. Warty surface provides distinctive popcorn appearance.

L
F1

Scarface

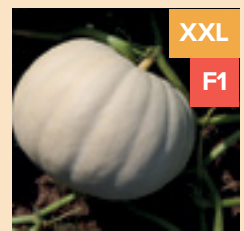

Large warty fruit with eye-catching texture. Firm, durable warts and rind for handling and transport. Slightly upright shape adds uniqueness to displays.

L
F1

New Moon

Vigorous full-vine habit delivering consistent yields. Thick white flesh prized for culinary and display purposes. Uniform, round to slightly tall fruit shape enhancing marketability.

XXL
F1

Squash

Stripetti

SUMMER SQUASH

Sweet flavour with improved texture over traditional spaghetti squash. Distinctive striped rind providing strong ornamental appeal. Uniform fruit size and shape for consistent marketing.

S

F1

Cue Ball

SUMMER SQUASH

Round squash, smooth, pale green fruit, upright, vigorous bush habit. Easy harvesting, multiple pickings for growers and gardeners. Maturity in approx 40-45 days. Excellent flavour.

XS

Saffron Prolific

SUMMER SQUASH

High-yielding, compact semi-crookneck summer squash. Uniform, tapered fruits known for their rich flavour, suitable for home gardens and commercial markets.

XS

Crookneck Yellow

SUMMER SQUASH

Mild, sweet flavour with versatile culinary uses. Continuous production when harvested at 12-15cm/5-6in. Dense bush habit with low growth for easy management.

S

Turk's Turban

Distinctive turban-shaped fruit with a dual squash appearance. Hard rind for extended storage and durability. Sweet, nutty flavour suitable for culinary uses such as stuffing.

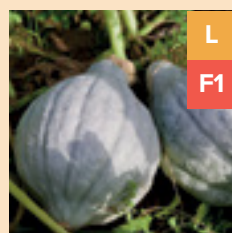

S

Heavenly Hubbard

WINTER SQUASH

Uniform blue-grey fruit with excellent visual appeal. Sweet, fine-textured flesh ideal for cooking or baking. Vigorous vines deliver high yields consistently.

L

F1

Prism

BUTTERNUT SQUASH

High-quality butternut squash tailored for the fresh market. Produces uniformly shaped fruits with the classic butternut form, smooth tan skin, and rich, sweet, deep orange flesh.

S

Victory

BUTTERNUT SQUASH

Developed for the fresh market. Uniform fruits approx 18cm/7in long, weighing around 1.2kg/2.5lbs. Rich, sweet, deep orange flesh. Excellent eating quality, strong visual appeal.

S

Avalon

BUTTERNUT SQUASH

High uniformity and strong field performance. Natural tolerance to mildew enhances crop reliability. Smooth rind with excellent packing quality.

S

Reno

BUTTERNUT SQUASH

Classic acorn shape with moderate furrows. Strong single-stem bush habit for ease of harvest. High yields with consistent fruit quality. Fine-textured, sweet nutty flesh ideal for culinary use.

S

Gourd

Small Spoon

Small, spoon-shaped fruits with bi-coloured striped skin. Vigorous trailing vines suitable for training on supports. Huge yields perfect for crafts, autumn, and winter decorations.
