8.5

Septoria Tritici resistance
2026 AHDB RL

87%

UK untreated yield
2026 AHDB RL

Key characteristics

- Excellent Septoria Tritici resistance of an 8.9 making it the highest scoring on the recommended list
- Suited to progressive regenerative farmers and sustainable supply chain leaders
- Mayflower combines early maturity and high milling quality with fantastic disease resistance
- Mayflower exhibits fantastic untreated yield performance
- Responds well to lower inputs, including reaching protein at lower N rates

Recommended for

- ✓ Milling
- ✓ Reduced input systems
- ✓ Early grass weed suppression
- ✓ Direct early drilling
