

# SU Arion

High yielding winter barley variety

## 107%

Eastern treated Yield  
2025 AHDB RL

## 105.00%

Northern treated yield  
2025 AHDB RL

## 1.50%

Screenings (through 2.25mm)  
2025 AHDB RL

## Key Characteristics

- One of the lowest screenings available
- Good all round disease profile
- Suitable for light and heavy soils
- Best grown after a legume or WOSR crop to maximise malting quality
- Traditional winter barley drilling slot

## Recommended for

- Malting

## Growing Information

UK treated Yield 104%	UK untreated yield 86%	Western Treated Yield 99
Light Soils 107	Heavy soils 105	Late Sowing Suitability Yes
Net Blotch 7	Rhynchosporium 6	Brown Rust 6
Mildew 8	Lodging Treated/Untreated 7/6	Specific Weight 68.8
