

Neptun

A newly recommended spring oat from Saaten Union with exceptional quality, high kernel content, very high specific weight, and low screenings, already generating strong early interest from millers.

101%

UK treated yield
2026 AHDB RL

93%

Untreated yield
2026 AHDB RL

8

Mildew resistance
2026 AHDB RL

Key Characteristics

- Fast speed of development with medium to high tillering capacity
- Exceptional quality, high kernel content, massive specific weight and low screenings
- Good disease resistance package
- Early Maturity

Recommended for

- Milling
- Feed

Growing Information

UK Yield 101%	Untreated yield 93%	Mildew 8
Crown rust 5	Kernel content 74%	Specific weight 53.9kg/hl
Screening (% through 2.00mm) 2.2%	Resistance to lodging without PGR (1-9) [7]	Straw length without PGR [117]cm
