

Picador

The most vigorous variety in the Elsoms range, responding well to a wide range of sowing densities. Competes strongly against weeds and produces excellent white roots with a good shape. Very high yield potential and handles well in the pack house. Suitable for processing.

140

Days to maturity (UK)
Approximate number of days from sowing to maturity

8

Leaf vigour
Elsoms independent trials (1 = very low/poor, 9 = very high/good)

7.5

Root length
Elsoms independent trials (1 = very low/poor, 9 = very high/good)

Key Characteristics

- Very vigorous
- Responds well to various sowing densities
- Strong weed competition
- Excellent white roots with good shape
- Very high yield potential
- Handles well in the pack house
- Suitable for processing
