

Pearl

Maincrop to late-season variety with high yield per root and high pack-out percentage in pre-pack grades. Outstanding white colour and attractive skin quality. Extremely uniform with good root weight distribution. Well suited for high-density production. Ideal for long-term field storage and excellent canker resistance.

150

Days to maturity (UK)
Approximate number of days from sowing to maturity

5.5

Leaf vigour
Elsoms independent trials (1 = very low/poor, 9 = very high/good)

5

Root length
Elsoms independent trials (1 = very low/poor, 9 = very high/good)

Key Characteristics

- Maincrop to late season
- High yield per root
- High pack-out percentage
- Outstanding white colour
- Attractive skin quality
- Extremely uniform
- Good root weight distribution
- High-density suitability
- Long-term field storage potential
- Excellent canker resistance

Recommended for

- Pre pack
