

Jet

Jet is an early-maturing SU yellow sweetcorn adaptable to most planting times. It has a medium-long cylindrical cob and good husk protection.

69

Days to maturity

Approximate number of days from sowing to maturity

19 cm

Cob Length

Standard processor size requirements, typically ranging between 18–22 cm

14–16

Kernel Rows

Approximate number of kernel rows per cob; actual row count may vary with growing conditions.

Key characteristics

- High resistance to Rust Common (Ps) Rp1 d
- Medium-long cylindrical cob
- Good husk protection
- Adaptable to most planting times
