

Prelude

Prelude is a mid-late SU yellow sweetcorn with flexible fresh-market and processing use. It combines reliable yields with broad adaptability.

79

Days to maturity
Approximate number of days from sowing to maturity

19 cm

Cob Length
Standard processor size requirements, typically ranging between 18–22 cm

16–18

Kernel Rows
Approximate number of kernel rows per cob; actual row count may vary with growing conditions.

Key characteristics

- Reliable Yields
- Flexible for fresh and processing

Recommended for

-  Fresh Market
-  Processing
