

Enterprise

Enterprise is a late-maturing SU yellow sweetcorn with strong husk protection. Its strong plant is well suited to the end of the harvest season.

85

Days to maturity
Approximate number of days from sowing to maturity

21 cm

Cob Length
Standard processor size requirements, typically ranging between 18–22 cm

18–20

Kernel Rows
Approximate number of kernel rows per cob; actual row count may vary with growing conditions.

Key characteristics

- Broad disease protection
- Strong husk protection against birds and insects
- Strong plant for the end of the season
- Excellent option to finalise the harvesting season
