

Camden

Camden is a late-maturing SU yellow sweetcorn with high disease resistance. It cans and freezes well and has good husk protection.

86

Days to maturity
Approximate number of days from sowing to maturity

21 cm

Cob Length
Standard processor size requirements, typically ranging between 18–22 cm

18–20

Kernel Rows
Approximate number of kernel rows per cob; actual row count may vary with growing conditions.

Key characteristics

- Reliable yields
- High disease resistance

Recommended for

 Processing
