

# Ambermax

Ambermax is a vibrant *Cucurbita maxima* variety producing small to medium oblate fruits weighing 1.5–2 kg. The deep orange colouration and smooth rind deliver strong visual impact for retail. With two to three fruits per plant and moderate eating quality, Ambermax is positioned as a reliable fresh market performer.

## 100–110 days

Days to maturity  
Suitable for UK seasonal pumpkin market supply.

## 1.5–2 kg

Average fruit weight  
Suitable for both display and cooking purposes.

## Uniform oblate form

Fruit shape  
High shelf appeal with tidy handle and finish.
