

# Orange Cutie

Orange Cutie is a compact cucurbita maxima bush-type squash with vivid red-orange skin and an oblate shape. Its small fruits are ideal for fresh market sales and decorative displays. Plants are medium invigour yet highly productive, setting three to five fruits per plant with reliable uniformity.

## 100 days

Days to maturity  
Performs well under close spacing in spring sowings.

## 1–2 kg

Average fruit weight  
Small-fruited, uniform pumpkins with excellent visual quality.

## Oblate with red skin

Fruit shape  
Attractive appearance with good market appeal.

### Key Characteristics

- Compact bush habit suitable for high-density plantings.
- Consistent fruit size and uniform shape.
