

# Nightingale

A conventional oilseed rape candidate with exceptional performance in the North.

98.3

UK Gross Output (% controls)  
AHDB WOSR Candidate List 2026-27

46.1

Oil content (%)  
AHDB WOSR Candidate List 2026-27

102.5

North Yield (% controls)  
AHDB WOSR Candidate List 2026-27

## Key characteristics

- High treated yield
- Exceptional performance in the North
- Excellent stem stiffness
- Good reistance to lodging

## Recommended for

-  Oil production
-  Feed

## Growing Information

|                                              |                                      |                                             |
