

KEY FEATURES

- Very vigorous and quick to establish
- Excellent for field production
- Suits spring and autumn production

CARIBE

Description: A vigorous variety suited to early and late production. Caribe has an erect habit with wide dark green healthy foliage and good-sized leaves. Very aromatic and uniform to harvest. It has high yield potential and good tolerance to bolting in cooler conditions.

Performance: Scores assigned from Elsoms' own trials.

■ Caribe ■ Industry standard Key: 1=low 10=high

Maturity: 48 days

Growing: Direct seed rate 15-20kg per ha.

Pot sow rate 30-35 seeds per pot.

Elsoms own trials have shown Caribe to be suitable for pot, field grown or as a micro green.
