

KEY FEATURES

- **Vigorous with thick, strong leaves**
- **Slow hearting**
- **Resistance to anthocyanin and yellow leaf**

VERVE

Description: Vigorous all year round, Verve is a great choice for Spring Cabbage growers. From the Elsoms breeding program, Verve has been developed with an emphasis on leaf quality, vigour and high head weights. Head weights range between an impressive 400-500g. Because of its slow hearting nature, Verve can handle large scale productions. Its bulky, green plants are ideal for bagging or processing. Growers have noted how Verve maintains a brilliant colour well beyond maturity.

Performance: Scores assigned from Elsoms' own trials.

■ Verve ■ Control variety

All data relates to UK trials.

*Days to maturity figures shown relate to optimum maturity and do not relate to possible extension of harvest period by storage. **1 to 10 (1=very low/poor 10=very high/good).
